Intelligent Cleaning Solutions For Professional Environments

SUTO is a professional cleaning equipment supplier specializing in the design, development, and manufacturing of floor cleaning machines, including ride-on floor scrubbers, walk-behind floor scrubbers, compact scrubbers, and floor sweepers.

With strong manufacturing capabilities and years of experience in the cleaning equipment industry, SUTO provides reliable cleaning solutions for industrial, commercial, and public environments worldwide.

Our products are designed to improve cleaning efficiency, reduce labor costs, and deliver consistent cleaning performance in demanding applications such as warehouses, factories, logistics centers, shopping malls, hospitals, and parking facilities.

Through strict quality control, continuous product improvement, and flexible OEM/ODM services, SUTO works closely with global distributors and professional cleaning companies to provide customized solutions and long-term business support.

Product Range

Complete Cleaning Solutions For Every Environment

SUTO provides a comprehensive range of professional cleaning equipment designed to meet the needs of industrial, commercial, and public environments.

From compact cleaning solutions for small spaces to high-performance machines for large facilities, SUTO delivers reliable equipment to improve cleaning efficiency and reduce operational costs.

Compact Floor Scrubbers

Walk Behind Floor Scrubbers

Ride on Floor Scrubbers

WHY CHOOSE SUTO

Built For Professional Industrial Cleaning Performance

Heavy Duty Structure

Integrated Aluminum Alloy Die-Cast Chassis

Protected Circuit Board

Coating a circuit board provides effective protection against water and short circuits.

High-Performance Motors

All motors undergo rigorous endurance testing before leaving the factory.

OEM/ODM Customization

You can customize the device color, battery capacity, and the logo on the device, as well as the user manual.

In-house Component Manufacturing

SUTO has the capability of manufacturing key components in-house, ensuring better quality control, production consistency, and reliable supply throughout the manufacturing process.

Comprehensive Spare Parts Support

SUTO maintains a complete spare parts inventory to ensure fast replacement and reliable after-sales support for customers worldwide. With a wide range of original spare parts available, we help minimize machine downtime and keep your cleaning equipment operating at peak performance.

X20

COMPACT FLOOR SCRUBBER

Compact, Efficient, Reliable

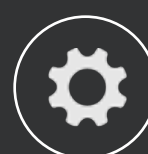

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

· Compact Size for Small & Medium Areas

Space-saving body fits narrow aisles in supermarkets, retail stores, offices and small warehouses, easily reaching cramped floor sections inaccessible for large cleaning machines.

· Intuitive Hand-push Operation

Ergonomic handle design requires minimal training for operators. Staff can start daily cleaning work quickly, with much lower physical fatigue compared with manual mopping.

· Integrated Scrubbing & Vacuum Recovery

The brush scrubs floor stains while the rear squeegee sucks up wastewater simultaneously. Floors dry right after cleaning to avoid slip hazards for pedestrians, no secondary manual drying needed.

· Durable, Stable Performance

Reliable core components support long-hour daily commercial use, reducing unexpected downtime and maintenance frequency for steady daily cleaning tasks.

Product Overview

This compact walk-behind floor scrubber is built for routine floor maintenance across small and medium commercial spaces like retail stores, offices, cafes and small warehouses. It merges scrubbing and wastewater suction into one workflow to replace slow manual mopping, drastically boosting cleaning efficiency.

Designed with a slim body and ergonomic push handle, the machine moves flexibly through narrow aisles and tight corners inaccessible to large ride-on cleaners. Staff can start operation quickly with barely any training. As the rotary brush strips ground stains, the rear squeegee collects dirty water at once, leaving floors completely dry immediately to avoid pedestrian slip risks.

It works reliably on tile, epoxy, vinyl, concrete and other hard flooring. Industrial-grade core parts support long daily working hours, alongside low power and consumable wear. This scrubber cuts labor and recurring operating costs, delivering a budget-friendly, high-performance cleaning option for commercial facility management.

Technical Specifications

Model	X20
Cleaning Width	380mm
Squeegee Width	460mm
Solution Tank Capacity	20L
Recovery Tank Capacity	25L
Brush Motor	200W
Vacuum Motor	150W
Machine Size(L*W*H)	765*475*557mm

WALK BEHIND FLOOR SCRUBBER

Compact, Efficient, Reliable

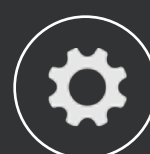

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

1. Dual Brush High-efficiency Cleaning System

Equipped with two brush discs to deliver wider single-pass cleaning coverage compared with single-brush models. It rapidly strips heavy dirt, oil stains and ground grime on concrete, epoxy, tile floors, greatly boosting daily cleaning throughput for medium-to-large commercial spaces.

Integrated Scrubbing & Instant Water Recovery

2. Rotary brushes scrub floors while the rear rubber squeegee vacuums up wastewater simultaneously. Floors become dry immediately after cleaning, eliminating slip hazards for pedestrian traffic and removing extra manual drying work.

Large-capacity Integrated Water Tanks

3. The enlarged clean and dirty water tanks cut the frequency of water refilling and sewage draining, supporting longer continuous operation for warehouses, supermarkets, factory workshops and other large-area cleaning scenarios.

Durable Industrial-grade Body Construction

4. Thick molded plastic casing resists chemical corrosion, bump damage and long-term wear from daily heavy use. Core motors and transmission components are rigorously tested to lower failure rate and long-term maintenance cost.

Product Overview

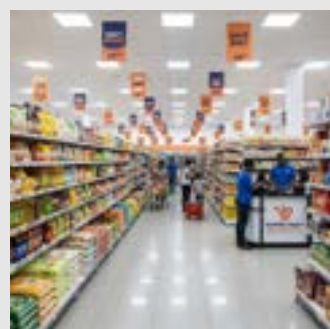

This dual-brush walk-behind floor scrubber integrates scrubbing and wastewater recovery for one-pass cleaning. With enlarged tanks and rugged housing, it delivers high-efficiency continuous cleaning for factories, warehouses

Technical Specifications

Model	X40
Cleaning Width	550mm
Squeegee Width	800mm
Solution Tank Capacity	40L
Recovery Tank Capacity	50L
Brush Motor	150W*2

WALK BEHIND FLOOR SCRUBBER

Compact, Efficient, Reliable

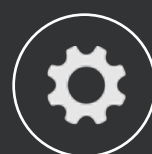

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

1. Integrated scrubbing & water recovery

Single-pass operation finishes floor scrubbing and sewage suction, leaving surfaces dry immediately to avoid slip risks.

2. Ergonomic walk-behind design

Comfortable push handle enables flexible steering around obstacles; operators can master use quickly with minimal training.

3. Stable heavy-duty cleaning performance

Robust main body and reliable brush motor handle daily stains on tile, epoxy, concrete and other hard floors for factories, malls and warehouses.

4. Efficient rear squeegee assembly

Adjustable squeegee reliably collects wastewater across uneven ground, maintaining steady cleaning results.

5. Optimized internal water tank layout

Sufficient tank capacity extends continuous working time, reducing frequent water filling and drainage breaks.

Product Overview

The X55T walk-behind floor scrubber integrates floor scrubbing and wastewater suction for one-pass cleaning. Featuring an ergonomic handle, adjustable squeegee and large dual water tanks, it maneuvers flexibly in warehouses, malls and workshops. Its rugged structure supports long continuous operation on tile, epoxy, concrete and other hard floors, effectively lowering labor costs while delivering reliable daily cleaning results.

Technical Specifications

Model	X55T
Cleaning Width	500mm
Squeegee Width	800mm
Solution Tank Capacity	50L
Recovery Tank Capacity	60L
Brush Motor	550W

WALK BEHIND FLOOR SCRUBBER

Compact, Efficient, Reliable

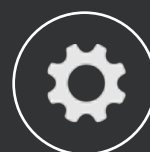

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

1. Small footprint with excellent mobility, ideal for supermarkets, schools, offices, and narrow spaces.
Powerful Cleaning Performance
2. High-efficiency brush motor delivers deep cleaning performance on various hard floor surfaces.
Large Capacity Tanks
3. Separate clean and recovery water tanks reduce refill frequency and improve cleaning efficiency.
Efficient Water Recovery System
4. Advanced squeegee design ensures quick water pickup and leaves floors clean and dry.
Easy Operation & Maintenance
5. Simple controls and tool-free access to key components make daily operation and maintenance easier.

Product Overview

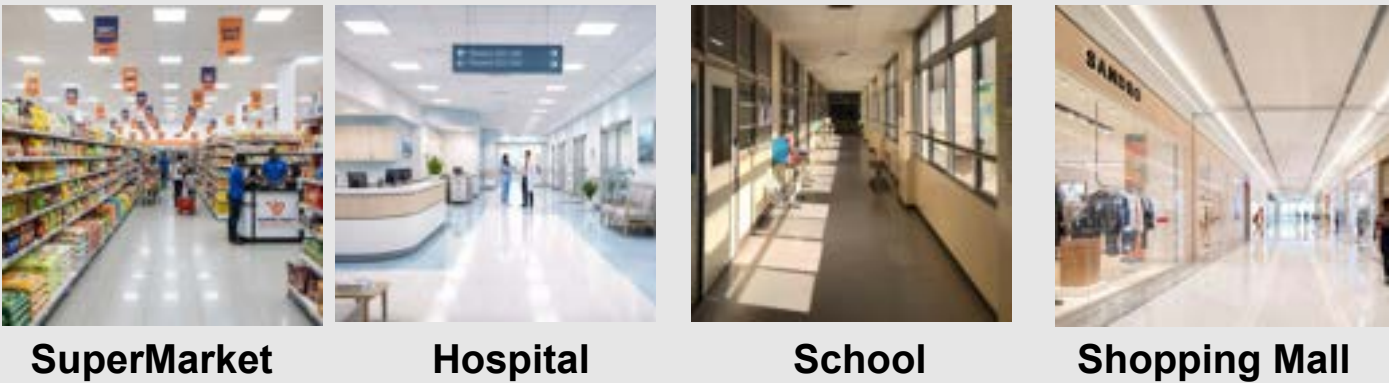

The X60 walk-behind floor scrubber integrates floor scrubbing and wastewater suction for one-pass cleaning. Featuring an ergonomic handle, adjustable squeegee and large dual water tanks, it maneuvers flexibly in warehouses, malls and workshops. Its rugged structure supports long continuous operation on tile, epoxy, concrete and other hard floors, effectively lowering labor costs while delivering reliable daily cleaning results.

RIDE ON FLOOR SCRUBBER

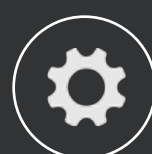

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

- Agile compact ride-on frame for confined passages
- Dual-disc powerful scrubbing for tough floor dirt
- Large dual tanks for extended continuous work
- Reliable squeegee for instant floor drying
- Comfortable seated operation, easy maintenance
- Eco-friendly battery power for indoor applications

Product Overview

ST-X70 ride-on floor scrubber delivers efficient one-pass cleaning for spacious facilities. It combines agile movement, extended runtime and easy maintenance to cut labor input for industrial and commercial floor care.

Technical Specifications

Model	X70
Cleaning Width	550mm
Squeegee Width	800mm
Solution Tank Capacity	70L
Recovery Tank Capacity	80L

RIDE ON FLOOR SCRUBBER

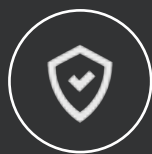

Quality, Efficient, Reliable

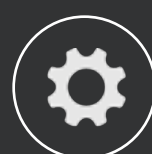

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

Efficient Dual Brush Cleaning System

Equipped with dual brush motors, the X110N provides powerful scrubbing performance for effective dirt and stain removal.

Large Capacity Water Tanks

90L solution tank and 110L recovery tank reduce the frequency of water refilling and improve continuous cleaning efficiency.

Comfortable Driving Experience

The ergonomic operator design and intuitive controls ensure comfortable operation during long cleaning tasks.

Product Overview

SUTO X110N Compact Ride-on Floor Scrubber

The SUTO X110N is a compact ride-on floor scrubber designed for efficient cleaning in small to medium-sized commercial and industrial environments.

Combining a powerful dual brush system, efficient water recovery technology, and an ergonomic driving design, the X110N delivers excellent cleaning performance with easy operation and low maintenance requirements.

With its compact structure and flexible maneuverability, it is an ideal solution for supermarkets, workshops, schools, warehouses, and commercial facilities where cleaning efficiency and space utilization are equally important.

Technical Specifications

Model	X110
Cleaning Width	660mm
Squeegee Width	1000mm

LARGER RIDE ON FLOOR SCRUBBER

Compact, Efficient, Reliable

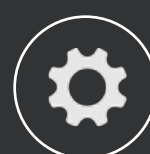

High Cleaning Efficiency

Large Capacity Tanks

Easy Operation & Maintenance

Reliable Performance

Key Features

Powerful Cleaning Performance

Equipped with a high-performance brush system and efficient vacuum motor, the SUTO ride-on scrubber delivers excellent cleaning results for large commercial and industrial areas.

High-Efficiency Operation

Designed for large floor areas, the ride-on design improves cleaning productivity while reducing labor costs and operator fatigue.

Large Capacity Tanks

Large solution and recovery tanks allow longer continuous operation with fewer water refills, improving overall cleaning efficiency.

Product Overview

The X160 ride-on floor scrubber is engineered for heavy-duty large-area cleaning in warehouses, manufacturing plants, underground parking lots and logistics facilities. Equipped with wide cleaning & squeegee coverage and large-capacity water tanks, it completes scrubbing and wastewater recovery in one pass. Matched with stable brush, vacuum and drive motors, this unit achieves high daily cleaning throughput. Its practical overall size ensures good maneuverability within rack aisles, while seated operation reduces labor intensity, serving as a cost-effective floor care solution for industrial and commercial sites.
